## **DETAILED ACTION**

### ***Application and Claims Status***

1. Applicant's preliminary amendment filed on 10/03/2005 is acknowledged and entered.
2. Claims 1-39 were pending. Applicants have amended claims 1-6, 8, 10, 11, 13-21, 23, 25, 26, 28-33, 35, and 37-39. No claims were added and/or cancelled. Therefore, claims 1-39 are currently pending and are under consideration in this Office Action.

*Additionally*, it is noted that claims 37-39 are improperly designated, i.e. there are no designation and they contain markings that clearly shows changes have been made, and as a result it should be designated as 'Currently amended'. Appropriate correction is required.

### ***Election/Restrictions***

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group A, claims 1-16, drawn to an electronic assembly.

Group B, claims 17-28, drawn to a panel device.

Group C, claims 29-39, drawn to a housing.

4. The inventions listed as Groups A-C do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 2629

The technical feature linking Groups A-C appears to be that they all relate to a display apparatus comprising two display panels wherein each panel has two different positions. This special technical feature is well known in the art. Moreover, Moscovitch et al. (US Patent 6,343,006 B1) discloses a computer display screen system comprising at least display panels wherein each panel has two different positions (see e.g. Abstract; figs. 26, 27, 38-42, and 44-47). Therefore, the technical feature linking Groups A-C does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
